

# Dan Hanley

KITCHEN DESIGNER

Dan Hanley worked as a remodeling contractor for 13 years, bringing a very valuable point of view to kitchen design. Over the past 20 years, he has been applying his skills exclusively to kitchen and bath design in the Midcoast area. Dan appreciates the value kitchens hold in our homes and steps up to the challenge that each unique space brings. Having the construction background really helps Dan key in on the importance of functionality needed in a kitchen space.

*“I always look forward to seeing the finished kitchen and the customer getting just what they were looking for.”*
